S.T.E.E.L.

Introducing the
RELIABILITY
*Pro*vin
S.T.E.E.L. Program.

S - Selective Sourcing
T - Tempering and Treating
E - Expert Assembly
E - Ease of Service
L - Lifetime Testing

The S.T.E.E.L. program is a 5-step process to ensure complete customer satisfaction and product

RELIABILITY

S - Selective Sourcing

The S.T.E.E.L. program begins by sourcing only the best steel based on chemical and micro-structure analysis.

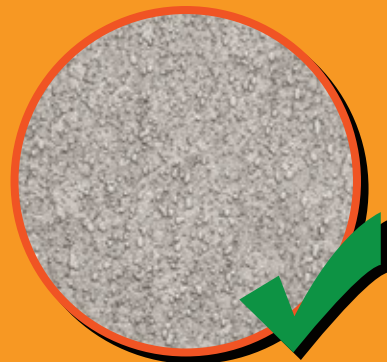

After raw materials have been carefully selected, state-of-the-art machining centers form parts to exacting specifications.

T - Tempering and Treating

Our state-of-the-art heat treatment process dissolves large carbon deposits.

A lack of large carbon deposits makes the steel structure more uniform and resistant to breakage.

Shown are before and after photos of carbon deposits in steel.

E-Expert Assembly

At Reliability Provin, we are always improving our lineup of piston driver assemblies.

Our driver blades are cleaned of debris and primed before applying a powerful bonding agent.

Aircraft grade aluminum pistons are used for lasting performance.

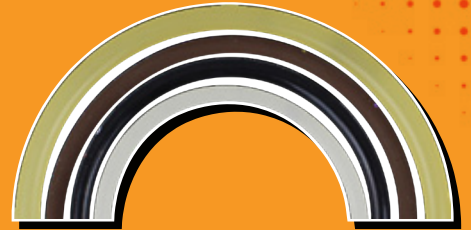

E-Ease of Service

After shipment, we make it easy for our customers to follow up on products.

With date stamps, we are able to track batch issues and ensure quality products are always shipped.

With a variety of longlife and oversized O-ring options available, we are ready to meet our customers' needs.

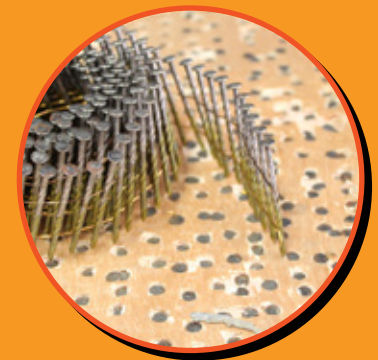

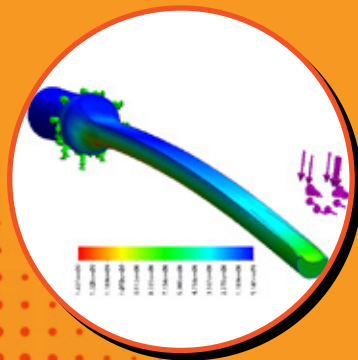

L-Lifetime Testing

Our Two Stage Blade Testing process provides us with the knowledge and data to ensure the best possible product.

Using computer simulated stress-load calculations, we identify problem areas and set test methods.

Real-world application testing ensures maximum performance in the tool and on the job.

The right blade for you depends on your usage and application.

"A-Series" blades are made from one of the most shock absorbent steels available for high impact applications.

"X-Series" blades are made from one of the hardest steels available for high wear applications.

**Viton
O-Rings**

With over 650 unique O-Rings, we make it easy to find the perfect fit.

Quad, Square, and Internally Lubricated O-Rings are available for specialty tools.

Long Life versions of our most common O-Rings ensure that your tool operates safely and efficiently longer between repairs.

In the event that we do not stock the O-Ring that you need, please contact us to discuss your O-Ring specifications.

We offer O-Ring repair kits for over 600 tool models. These kits are used to replace old O-Rings throughout the entire tool during a rebuild.

All O-Ring repair kits come with a tool schematic and color-coded O-rings to assist in the repair process.
